Nod to nature

PIE // Green goes to the next level with PIE—aka Project Import Export—a year old green furniture company based in Florida. PIE's main source of materials—water hyacinth, liana, rattan, and bamboo—are rapidly growing plants that are often uprooted because they are harmful to ecosystems, but PIE tames these wild tyrants into furniture art. Take a look at their "Easy" lounge and elegant "Stomach" chairs made from bamboo. You won't find a more stylish way to incorporate kudzu into your living room.
