4. LIFE OF PIE

After testing the waters around the U.S., Canada and Europe, **Project Import Export (PIE)** is focusing on its hometown Miami. The eco-friendly line, developed by architect-turned-furniture designer Bannavis Andrew Sribyatta, debuted at Los Angeles' CABoom2 design convention in 2005. Natural materials such as water hyacinth, liana, bamboo and rattan are manipulated into curvaceous designs and rich textures. Available at Biltmore Domicil, 1700 Alton Rd. 305-604-0059. projectimportexport.com.

PIE

PIE. Created by Miami designers who wanted to make furniture an art form and create a better modern lifestyle. Their curvaceous profiles and rich textures generate warmth and sensuality to modern furniture. PIE's furniture is Eco-Friendly (StomachBB). 786-543-3037. www.projectimportexport.com.
