Lean Back

Ever wish you could save the planet while taking a nap? Sleep in a PIE chaise, and you're on your way. Eco-friendly furniture design company PIE uses natural materials like liana (shown) and water hyacinth, whose overgrowth imposes an imbalance on the ecosystem, to create modern, sculptural furniture. These lounges can be used indoors or in a covered outdoor area. *\$1,970 each, from PIE, 19331 SW 31st Ct, Minamar, (786) 543-3037 or www.projectimportexport.com. —O.B.*
